SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION CD-78

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest to USI. The purpose of this session was to describe a target designated by UTM coordinates and determine if activity at the target was military related.
2. (S/NOFORN) The protocol used for this session is detailed in the document, Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
3. (S/NOFORN) At TAB A is a summary of the data presented by the remote viewer during the session. A complete transcript of the session is available upon request. At TAB B are drawings made by the remote viewer reference his impressions of the target site. At TAB C is target cuing information provided the remote viewer.
4. (S/NOFORN) The summary at TAB A represents the salient points provided by the remote viewer and as such has not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.

7 July 1980

SUBJECT: Summary of Unconfirmed Source Information Pertaining to the  
Area Surrounding UTM Coordinates [REDACTED] (S/NOFORN) (CD-78)

1. (S/NOFORN) The following information was provided by the source on  
3 July 1980 at 1030 hours. The information was described as pertaining to UTM  
coordinates [REDACTED] SG1B

a. (S/NOFORN) The source described a large radar type tower as being  
at the above coordinates. He thought that it was approximately 60 feet high  
and contained at least two whip antennae on the top, and two smaller ones on  
each side near the bottoms of the disk. He thought there might be two other  
small disks near the top as indicated by the circles containing an "X" in  
drawing #2. He also described the antenna shown to the left of the tower in  
the drawing as being attached to the tower. He thought that the tower was  
operated by a military unit of 10 or 12 personnel for the purpose of monitoring  
shipping lanes or routes. He thought it was like a radio relay station he had  
seen in Holland. He thought that there was a black top road between the tower  
and the beach, beyond which was the shipping lanes. The source described the  
area as a warm sunny climate, and that much of the foliage was of a thick broad  
leaf variety.

b. (S/NOFORN) The source thought that the tower was used to monitor,  
direct or advise large cargo ships, freighters. He briefly mentioned a hidden  
or canvas covered cargo on a black Soviet ship. He seemed concerned that the  
cargo was covered when its presence on the ship was "not that big a deal, its  
available for public viewing." The source thought he had seen Slavik writing  
on the bow of the black ship. He thought the cargo was of a military nature,  
it's primarily bulk cargo arms ammunition, blankets, etc., just logistical  
stuff and also some helicopters.

c. (S/NOFORN) The source seemed at ease and confident during the  
interview.

2. (S/NOFORN) This data should be evaluated as soon as possible and  
comments provided to this office not later than 25 July 1980. The comments  
will be used to evaluate the accuracy and intelligence value of the data provided  
by the source.

TARGET CUIING INFORMATION

Remote Viewing (RV) Session CD-78

1. (S/NOFORN) Prior to the session the remote viewer was provided no information at all concerning the target. He was given several encouragements and told that information he provided would be helpful to USI.
2. (S/NOFORN) <sup>SG1B</sup> At the beginning of the session the viewer was provided the UTM coordinates: [REDACTED] During the session the viewer was asked to describe the target and report activity at the target.
